ROAD SAFETY MANAGEMENT Ref: 1

To produce positive road safety outcomes, strong management in all aspects of road safety is key. Presence of a funded lead agency to guide the national road safety effort and implement a Safe Systems approach is recommended.

✓ South Africa has a lead agency present, Road Traffic Management Corporation (RTMC), Department of Transport, which is funded in the national budget, and has a road safety strategy which is partially funded. The functions of the agency include coordination, legislation and monitoring and evaluation of road safety strategies. The country only has a fatal road safety target, to reduce fatalities by 50% with a timeline of 2010 - 2020.

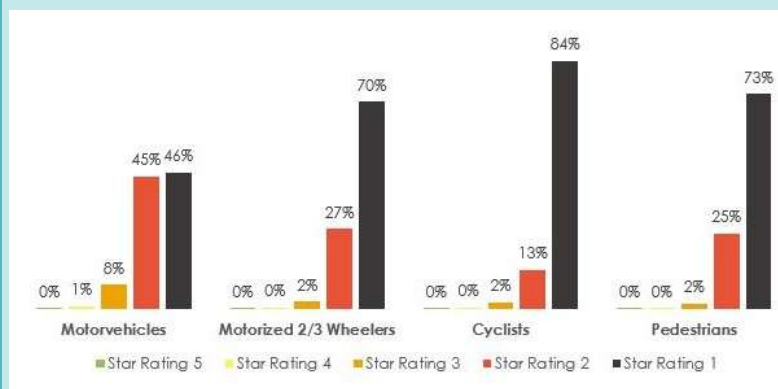

SAFE ROADS AND ROADSIDES Ref: 1,4

Improved infrastructure provides solid and well understood crash and injury reduction outcomes and are critical for long term and sustainable trauma reduction in line with the Safe Systems Approach. The International Road Safety Assessment Programme (IRAP) provide a business case for safer roads and road star ratings which give a simple and objective measure on the level of safety which is 'built-in' to the road for the road users. 5 Star roads are the safest while 1 star roads are the least safe.

Road Infrastructure Star Rating Results - South Africa

Surveyed Road Statistics: **93%** with no formal footpaths; **92%** with no pedestrian crossings; **100%** undivided with veh. speeds > 80 kph

Vehicle Occupant Travel: 7.7 billion km; Pedestrian Travel: 3.4 billion km; Motorcyclist Travel: 213,985,557 km; Cyclist Travel: 2.6 billion km

Business Case for Safer Roads

Infrastructure and Speed Management Investment required: **\$ 24.28 billion**

Annual Investment as a % of GDP (2019-2030): **0.56%**

Reduction in fatalities per year: **4,890**

Approximate reduction in fatalities and serious injuries (FSI) over 20 years: **1,080,000**

Economic Benefit: **\$ 102.44 billion**

B/C Ratio: **4**

SAFE SPEEDS Ref: 1,6,7,8

Speeding is a major risk factor for road crash injuries, contributing to both crash risk and crash consequences. A 5 % cut in average speed can result in a 20 % reduction in the number of fatal road crashes. Effective speed management measures such as establishing and enforcing speed limit laws, traffic calming through roadway design and other measures, and vehicle technology need to be widely implemented.

MAXIMUM SPEED LIMITS AND ENFORCEMENT

	60 km/h	100 km/h	120 km/h	Manual and Automated
✓				
NATIONAL SPEED LIMIT LAW	URBAN ROADS	RURAL ROADS	MOTORWAYS	SPEED ENFORCEMENT
Difference with Recommended Safe Systems Speeds	+ 30 km/h 6 times lower	+ 30 km/h 4 times lower	+ 30 km/h 3 times lower	Potential Decrease in Fatal Road Crashes from Enforcement of Safe System Speed Limits

MAJOR SPEED CALMING MEASURES BEING IMPLEMENTED IN SOUTH AFRICA:

✗ NARROWING	✓ VERTICAL DEFLECTIONS	✗ HORIZONTAL DEFLECTION	✗ BLOCK OR RESTRICT ACCESS
Include lane narrowings by extending sidewalks, curb extensions, pedestrian refuges etc.	Include speed bumps, humps, cushions, tables, raised pedestrian crossing, variation in ride surface etc.	Used to make vehicles swerve slightly, include chicanes, pedestrian refuges, chokers etc.	Include median diverters, closing streets to create pedestrian zones, cul-de-sacs etc.

SAFE VEHICLES Ref: 1,8

Universal deployment of improved vehicle safety technologies for both passive and active safety through a combination of harmonization of relevant global standards, consumer information schemes and incentives to accelerate the uptake of new technologies will reduce road crash fatalities significantly.

SAFE ROAD USERS Ref: 1,8

The key behavioral risk factors for road crash injuries are drunk driving, non-use of helmets, seat-belts or child restraint, and speeding. Establishing and enforcing laws to address these risk factors is effective in reducing road crash fatalities and their associated injuries.

POST CRASH CARE Ref: 1,8,9

Good post-crash care reduces deaths and reduces disability and suffering for road crash survivors. The emergency medical care system elements and processes need to be effective to attain this objective.
